HELPING STANDS

Support system consists of two easy to use, telescoping legs.

Provides a sturdy solution to mount wall items quicker and safer than other comparable products.

HELPING STANDS

Increases productivity while limiting labor man/hour requirements. Enables effective single installers to work alone and remain highly productive Allows the installer to work with both hands: Reduces possible strain to back and legs from multi-tasking & Improves efficiency at accomplishing a specific task.

A red Molding Hanger tool is suspended from a ceiling track in a room with wooden shelving units. The tool consists of a long red pole with a black hook at the top and a black bracket at the bottom. The background shows a room with a white ceiling, a light switch, and two wooden shelving units with multiple shelves.

Molding Hanger

Our patent pending Helping Stands Molding Hanger enables installers to work alone and remain highly productive for the installation of crown molding, windows, panels, and numerous other custom installations.

Our spring-loaded assembly can be operated from the top of a ladder or stilts as easily as it can from floor level.

This allows the work piece to be easily centered or fitted in its proper place.

No worry about cabinets falling off while you get a tool or go to lunch.

Easily adjustable
from 17" – 77".

Level working plane
for any size cabinet

Reduces job site injuries and property damage losses.

Cuts labor costs and reduces workers comp by improving safety performance.

Reduce physical strain resulting in less Installer fatigue allowing installers to produce more results with less effort.

Non-skid back keeps cabinet in place while protecting wall from damage.

Never struggle with uneven face frames. Allows the safe & easy adjustment of face frames or euro cabinets.

Attach multiple boxes.
Level and shim once.

Increased efficiency
given the time saving
function of Helping
Stands

We deliver a standard of excellence in our tools which makes us a leading provider of ergonomic tools for the construction and private industry that exceeds the customers' expectations.
